Case Study

72 Ton Tilting Bed Trim Press :

This press is a wonderful example of our custom equipment expertise. The tilting bed trim press is an impressive and substantial piece of equipment. However despite it's size it provides incredible flexibility and functionality.

Customer wanted to maintain short cycle time while maintaining a smooth running machine. This was accomplished by utilizing a proportion hydraulic technology.

The machine is integrated into an automated robot cell.

Fully assembled the machine weighed in at 55 tons.

Although sizeable, the hydraulic bed of the press tilted for easy loading and unloading.
